## Summary

---

Software Developer with healthcare and customer-service experience, and a Bachelor's in Computer Science. Looking to procure a full-time front or back-end Developer position, and has a strong team-focused mindset with commitment to continued learning and growth.

## Professional Experience

---

### Front-End Developer

**Remote/Fairfax, VA**

*Freelance*

*June 2022 - Present*

- Designed and developed interactive and responsive websites for companies and solo practitioners to maximize visibility.
- Created sites using HTML5, CSS3, and JavaScript, ensuring browser compatibility and optimal user experience.
- Implemented front-end frameworks with React and Bootstrap to create interactive and dynamic web interfaces.
- Enhanced client designs to maximize aesthetics and allow for seamless and intuitive navigation throughout the website.
- Developed reusable components and optimized rendering performance for smooth user experiences.

### Licensed Physical Therapist Assistant

**Fairfax, VA**

*Inova Home Health Care*

*May 2018 - Present*

- Planned and provided skilled therapy sessions to rehabilitate patients after hospitalizations.
- Increased patient treatment efficiency by 14% in 3 months, leading to improved patient outcomes.
- Used interpersonal skills to build relationships and trust with family members, resulting in 50% decreased fall risk.

## Projects

---

### Mobile Search Application *(in progress)*

- Created an application to search for job listings across multiple job boards using React Native, HTML5, CSS3, JavaScript, RapidAPI
- Integrated search and pagination functionality, enabling users to access and navigate through extensive datasets.
- Implemented API data fetching hooks for accurate and up to date data to ensure data integrity and timeliness.

### Web Application Testing

- Constructed end-to-end testing framework to automate functional website testing using Python, Pytest, and Selenium.
- Designed test-cases with HTML logging, Git, and Jenkins capability for collaborative testing and evaluation.
- Utilized Jira's bug-tracking and bug-reporting tools to ensure error free web application development.

### Appointment Scheduler | *IntelliJ* | [GitHub](#)

- Developed a GUI application using Java with JavaFX as the front end for customer appointment management.
- Implemented a secure database with SQL that stores user information and grants privilege based access control.
- Deployed application with CRUD capabilities with scalable and maintainable code structure.

## Education

---

### Bachelor's of Science in Computer Science

**Millcreek, Utah**

*Western Governors University*

*April 2023*

- **Certifications:** ITIL 4 Foundation
- **Capstone Project:** Stroke Incidence Prediction using Machine Learning

## Technical Skills

---

- **Programming Languages:** Java, Python, SQL, HTML, JavaScript, CSS
- **Frameworks:** Git, React, RapidAPI, VS Code, Selenium, Jupyter Notebooks, Jira
- **Libraries:** NumPy, pandas, PyTest, JavaFX
